

My wife and I each have over 30 years in the high-end retail and residential construction industry. We are mere sophomores in the car wash business. Yet we stumbled across the Hamlin location in 2015; in rust and ruins, and in foreclosure. So, we bought it, rolled up our sleeves to invest some sweat equity in it, along with all new equipment, and for the past four years it has been a destination in this rural region. 13 miles up the road, Hawley. Many customers had been reaching out to us to bring our brand to their town, as they have made that 13-mile trek to Hamlin. So, in 2019 we bought the car wash in Hawley, renovated, installed all new equipment.

We have grown to enjoy the rural Americana experience we can deliver as a In Bay Automatic, Self Wash Bays facility and operator. We have focused on the lifestyle needs of these lake region communities. Besides the standard "car wash" offerings, we offer a Dog Wash at Hamlin, and both locations are set up for Boat Washing. and yes, for that occasional bicyclist, we have a bike wash stations at each location.

The CAR WASH on RT6 just received the GREEN Business Award of the Year 2019, for our water recycling efforts, tankless water heater use, and LED lighting.

Thank you,

Dave Edwards

Partner & Fix-It Guy
